

# ISOCAL - 6 Range Europa Venus Calisto

- Multi Function: Six Modes including Dry Block and Liquid Bath
- Fast Response 35mm x 160mm Calibration Volume
- Calibrate Whole Measurement Loop

These models will calibrate temperature probes from -45°C to 250°C with unrivalled flexibility. As a traditional Dry Block, several thermometers can be quickly calibrated.

Accessories are available to convert to a stirred liquid bath, for surface sensor calibration, to calibrate infrared thermometers and even to use as an ITS-90 Fixed Point System with calibration uncertainties as small as 0.0005°C. With excellent stability and distributed heating cooling zones for good uniformity these calibrators offer proven thermal performance.

These award winning calibrators are easy to use and are available in three versions – the Basic, the Site and the ADVANCED. The Basic has a digital display of set and nominal temperature, the Site additionally includes an in-built independent temperature indicator for a reference probe. The ADVANCED controller has inputs for reference and test thermometers with a further range of sophisticated features including automatic temperature cycling, secure data logging and full colour high resolution display.

All models include I-Cal Easy LOG software and the ADVANCED models additionally include software to manage logged data and configure the unit, see page 14 for more details.

These models meet the calibration capacity requirements of EURAMET/cg-13/v.01, "EA Guidelines on the Calibration of Temperature Block Calibrators, formerly EA10/13. accuracy and best performance.

Choose English, French, Italian or Spanish Language	Yes - on full colour display	No	No
In Built Web Server	Yes	No	No
Tamper Proof Data	Yes - Suitable for life science, automotive and aerospace applications	No	No

# ISOCAL-6

## LIQUID & DRY BLOCK

### Metal Block Bath

Dry Block Calibrator provides fast and clean calibration of thermocouples, PRTs and other industrial sensors. Isotech blocks use a combination of multi zone and advanced materials technology to ensure constant temperature zones for high accuracy calibration.

### Stirred Liquid Bath

Remove the metal block to convert to a stirred liquid bath. Liquid bath operation allows angled or awkward shaped probes to be calibrated. Accuracies are improved over Dry Blocks alone and with a suitable reference probe performance of 0.005°C is achievable.

### Stirred Ice / Water Bath

The ISOCAL-6 models that operate below 0°C can be used to provide a 0°C stirred ice / water bath. This provides a simple low cost way of checking that standards have not drifted in between calibrations.

### Blackbody Source

Adding the blackbody target allows the testing of infrared thermometers. Low cost non-contact IR thermometers are increasingly being used in industry and the ISOCAL-6 is ideal to test and check these devices. The IR thermometer is focused on the target and compared to a reference probe in the block pocket.

### Surface Sensor Calibrator

With the Surface Sensor Kit the test sensor is compared to a platinum resistance thermometer located just below the surface of the block. Again save the cost of buying additional equipment by adding accessories as required to expand the ISOCAL-6 for new calibration applications.

### ITS-90 Fixed Point Apparatus

For the best possible performance with uncertainties to 0.0005°C (0.5mK) add an ITS-90 Fixed Point Cell. The most popular is the B8 Water Triple Point Cell, it is surprisingly affordable and simple to use - the triple point can be both created and maintained in the apparatus without the need for any other equipment or supplies.

World's First  
Multi-Functional  
Baths  
**SIX FUNCTIONS**

## Europa Venus Calisto Accessories

### Dry Block Mode with Inserts

**951-02-15** An Insert is included: (2 x 4.5mm, 2 x 6.4mm, 1 x 8mm & 1 x 9.5mm) x 157mm Deep. All Inserts have a 4mm tapped hole to suit supplied extractor tool.

### Alternative Inserts

**951-06-07** Alternative Insert type B 13mm, 10mm, 8mm, 5mm and 3.5mm dia. holes, all 157mm deep

**951-06-08** Alternative Insert type C 8mm, 6 x 6.5mm dia. holes, all 157mm deep

**951-02-15a** Blank Insert without pockets for local machining. Includes M4 tapped hole for supplied extractor tool.

**951-02-15c** Custom insert. Isotech can provide custom drilled pockets, minimum of 3mm separation between holes.

Contact Isotech with your requirements

### Stirred Liquid Mode with Liquid Container Kit **951-06-01**

Allows liquid bath use, includes container, magnetic stirrer, probe guide and sealing cap.

### Stirred Ice Bath Mode with Liquid Container Kit

Uses same liquid kit to provide 0°C reference as a stirred ice bath (Not Calisto)

### Thermometer Support Kit **921-02-06**

Allows three thermometers to be suspended in the bath, including liquid in glass types.

<b>520-05-01</b>	C10 Oil	-35°C – 140°C	0.1L
<b>951-06-06</b>	C20 Oil	20°C – 200°C	0.1L
<b>953-04-01</b>	VH Oil	150°C – 250°C	0.1L

### Infrared Calibration Mode with Blackbody Target **951-06-04**

Use optional Probe **934-14-82/DB** placed in the auxiliary block pocket for use as a reference.

### Surface Sensor Calibration with Surface Sensor Kit **951-06-02**

Includes angled platinum resistance thermometer.

### ITS-90 Fixed Point Cells **17724M**

Slim Mercury Cell (Europa Only).

**B8** Water Triple Point Cell (Venus and Europa)

**17401M** Slim Gallium Cell (Europa, Venus and Calisto)

### Standard Probe **935-14-82/DB**

Platinum Resistance Thermometer. Probe diameter 4mm, recommended pocket size 4.5mm. Angled head feature avoids sensors in block.

### Current Loop Interface **935-06-161**

24VDC Power Supply and Terminal Box. Powers 4-20mA Current Transmitters with 4mm terminal posts for easy connection.

### Carrying Case **931-22-111**

Sturdy case with room for accessories. Features wheels and pull out handle.

# Isocal-6 Performance and Use

**Venus and Europa**

**Calisto**

- Uncertainty with Reference Probe with optional UKAS Calibration
- Audit Calibration: Method comparing a PRT to UKAS Calibrated model
- Radial Homogeneity. Use for similar probes and external indicator

See Evaluation Reports for full details  
<http://www.isotech.co.uk>

## Alternative Methods of Calibrating with an Isocal-6

### ADVANCED Model

- Digital Display of Set and Nominal Block Temperature
- Inbuilt three channel indicator for reference probe and units under test
- Advanced features including automatic Temperature Cycling and Logging
- Best Practice calibration with established traceability and uncertainty

### SITE Model

- Digital Display of Set and Nominal Block Temperature
- Inbuilt single channel indicator for reference probe
- Best Practice calibration with established traceability and uncertainty

### BASIC Model

- For Quick and Easy Testing
- Digital Display of Set and Nominal Block Temperature
- Use with a separate external indicator to compensate for gradients and loading

**UKAS Calibration** available for these systems - *International Traceability - Best Practice* See page 14

# ISOCAL - 6 Range Hyperion • Drago

- Multi Function: Six Modes including Dry Block and Liquid Bath
- 65mm Volume: Ideal Liquid Bath
- Calibrate entire measurement loop - using a heat source rather than an electrical simulator, a test instrument and sensor can be calibrated as a system

The Hyperion and Drago have large calibration volumes, 65mm x 160mm deep, which makes them ideal to use as portable liquid baths. Stirred liquid baths are suitable for temperature sensors of all types, sizes and shapes. Liquid Baths can provide smaller calibration uncertainties than dry blocks and when used with suitable reference thermometers, accuracies of up to 0.005°C can be achieved.

These models are part of the award winning Isocal-6 family and with a reference probe can be used with different accessories for Dry Block, Infrared, Surface Calibration and even with ITS-90 Fixed Point Cells for uncertainties to 0.001°C. In Dry Block Mode, the large 65mm diameter block allows for the calibration of either larger probes or for calibrating many sensors simultaneously.

As a Liquid bath the sensors can be placed directly into the stirred liquid thus avoiding the need for specially drilled blocks. If the liquid is directly in the block then the controller only model, or Basic (B) model, can be selected. However, instead of putting liquids directly in the block liquid containers can be used to facilitate rapid change of fluids. For greater accuracy, or when using a liquid container, Dry Block Insert, Blackbody Target or the Surface Sensor Kit a separate reference thermometer should be used to compensate for the varying offset between the controller and the accessory temperature.

An ideal arrangement would be to include the handheld Isotech TTI-10 or the bench top Isotech milliK Precision Thermometer and Model 935-14-16 Semi Standard Platinum Resistance Thermometer.

<http://www.isotech.co.uk/industrial/>

Alternatively the SITE or ADVANCED model can be selected; the SITE includes a temperature indicator for a reference probe. The ADVANCED also includes inputs for test thermometers, automatic temperature cycling, logging and additional sophisticated features.

All models include I-Cal Easy LOG software and the ADVANCED models additionally include software to manage logged data and configure the unit, see page 14 for more details.

### Infrared Calibration Mode with Blackbody Target **936-06-03**

Use optional Probe 936-14-61DB.

### Surface Sensor Calibration with Surface Sensor Kit **936-06-04**

Includes an Insert and an angled platinum resistance thermometer.

### ITS-90 Fixed Point Cells

**B8** Water Triple Point Cell (Hyperion)  
**17401** Slim Gallium Slim Cell  
**936-06-09** Cell Holder Assembly

### Calibration

Includes three point traceable calibration certificate for block temperature

### UKAS Calibration

UKAS Calibration available to order, legally traceable in more than 70 countries.

### Standard Probe **935-14-61/DB**

Platinum Resistance Thermometer. 4mm diameter.

### Current Loop Interface **935-06-161**

24VDC Power Supply and Terminal Box. Powers 4-20mA Current Transmitters with 4mm terminal posts for easy connection.

### Carrying Case **931-22-112**

Sturdy case with room for accessories. Features wheels and pull out handle.
